

WMRE would like to state and propose that for RPS Class I import generators that have been approved to participate in Mass RPS program as a generator prior to or on July 2, 2008, should be able to grandfather/claim RPS Class I RECS for added/expanded capacity to their facilities that occurred after July 2, 2008, in which the facility has already gained prior approval from the Commission only additional capacity has been added and should not have to participate in FCA-4.
